Portfolio: <https://vasilis-arabatzis-github-io.vercel.app/>

PROFILE

Computer Engineering student with an interest in backend development and modern software technologies. Experience in building projects using Java, PHP, React, Next.js, JavaScript, MATLAB, and C++. Familiar with Docker, Git workflows, and database systems such as MySQL, PostgreSQL, and Oracle SQL. Able to develop applications ranging from web and desktop systems to algorithm-based projects, with a focus on learning, problem-solving, and practical implementation.

TECHNICAL SKILLS

Languages: Java, Python, PHP, JavaScript, TypeScript, MATLAB, C++

Frameworks & Tools: React, React Native, Git, Spring Boot, Docker

Web: HTML, CSS, Tailwind CCS

Databases: MySQL, Oracle SQL, PostgreSQL

PROJECT EXPERIENCE

- Built an e-commerce backend system using PHP, XAMPP, MySQL (phpMyAdmin), and PL/SQL, implementing product and user management features with database integration and structured data handling.
- Developed a desktop appointment booking system using Java, JavaFX, and Oracle SQL, focusing on scheduling functionality, database management, and user interaction handling.
- Created a mobile-oriented web application using PHP, JavaScript, AJAX, XAMPP, and MySQL (phpMyAdmin), implementing responsive features, dynamic data loading, and user-focused functionality.
- Developed a logic-based Sudoku game application using MATLAB, implementing algorithmic problem-solving, graphical interfaces with MATLAB Graphics, and MySQL database integration.
- Built a Task & Job Management REST API using Java, Spring Boot, PostgreSQL, and Docker, implementing RESTful endpoints with JSON-based communication and database integration.
- Developed a responsive personal portfolio website using React, Next.js, and TypeScript, focusing on modern UI design, reusable components, and frontend performance optimization.
- Implemented a numerical computing application in C++ using the Conjugate Gradient method for solving large sparse linear systems, focusing on efficient iterative optimization and algorithmic performance.
- Built a full-stack User Management Platform using Java, Spring Boot, React, PostgreSQL, and Docker, implementing RESTful CRUD operations, DTO-based layered architecture, frontend validation, and interactive user management features with Axios-based API communication.

EXPERIENCE

IT Internship – Public KTEO Xanthi • Supported software-related operations and internal processes • Assisted in technical tasks and system usage

EDUCATION

Democritus University of Thrace – Computer Engineering (2018–Present) | GPA: 7.09

2nd General High School of Xanthi

ADDITIONAL

Military Service -Reserve Second Lieutenant (Hellenic Army) Received a recommendation letter from Battalion Commander, and developed leadership, responsibility, discipline, and teamwork in structured and highpressure environments.

Driving License: Category B (Car), CategoryA1 (Motorcycle)

LANGUAGES

Greek (Native), English (Good)

INTERESTS

Basketball, hiking, outdoor cooking, and participation in cultural events,
